

Preprocessing

functions that take raw
Beiwe data or partner
data and produce
processed data

processed data is any 2d
array with `Person` and
`Datetime` columns

- `reduce_GPS`
- `reduce_ACC`
- `join_surveys`
- `data_quality`
- ...

Processing

any function on
preprocessed data that is
not final output

the goal is to standardize
basic tasks, such as
subsetting, shifting time,
joining processed data,
and creating features

- `subset_datetime`
- `lag_datetime`
- `data_union`
- `GPS_features`
- `ACC_features`
- `sleep_features`
- ...

Output
